Zulker Nien

Creative Javascript Developer | Ui/Ux Designer | 3D Model Developer

As a skilled JavaScript web developer with expertise in frontend and backend frameworks, I excel at creating dynamic React/Next web applications and visually captivating 3D interactive websites using three.js. I leverage tools like Clickup, Trello and Figma to optimize the planning, UI design and development process. Additionally, my certification in UI/Ux designing and the technical analysis skills that I have gotten through academic research are one of my most treasured and hard earned skills that I implement in my daily tasks.

"Don't watch the clock; do what it does. Keep going." — Sam Levenson
