PROFESSIONAL SUMMARY

Accomplished Full-Stack & Creative Developer with a Master's in Software Engineering and 5+ years of experience delivering innovative web solutions across startups and freelance platforms. Expert in React, Next.js, NestJS, Node.js, Three.js, and WebGL, specializing in immersive 3D web experiences, AR applications, and high-performance systems. Proven track record leading end-to-end product development, including CRM platforms, email marketing tools, 3D avatar creation and enterprise e-commerce solutions.

PROFESSIONAL SKILLS

Full-Stack Development: React, Next.js, NestJS, Node.js, PostgreSQL
3D Web: Immersive experiences with Three.js & WebGL
UI/UX Design: Creating intuitive and engaging user experiences
Team & Product Management: Leading teams and driving product strategy
AI & Research: Technical analysis and AI applications in healthcare

EXPERIENCE

Javascript Developer | 3D Web developer
Upwork | Dhaka, Bangladesh

August 2020 - Current

Top-Rated Freelancer with Consistent 5-Star Reviews from Over 10 Satisfied Clients

- Work experience across diverse industries including fashion, avatar creation, augmented reality, e-commerce, metaverse, and interactive media.
- Delivered over 15 successful software products, many featuring advanced 3D frontend interactions powered by Three.js.

As a passionate freelance developer and designer, I specialize in crafting immersive web and mobile applications using cutting-edge technologies like React, Next.js, Three.js, and React Native. My solutions drive measurable business growth with enhanced functionality, improved conversion rates, and seamless user experiences. I also create captivating visuals and 3D models with Adobe Illustrator, Photoshop, Blender, and A-Frame for AR integrations.

Notable Projects:

- AR-Incorporated Web Application Game for the Metaverse: Developed 3D character movements based on user interactions in a Next.js app, leveraging A-Frame and Three.js for augmented reality in vector space.
- Web based 3D avatar creation platform using Three.js and vanilla Javascript (Web version of Character Creator 4)
- E-commerce for a custom jersey website leveraging Three.js and react, integrated with Wix Velo.
- Interactive 3D Product Visualizer for Fashion Brand: Built a React-based configurator allowing users to customize clothing items in real-time with Three.js.

With a client-centric approach, I emphasize collaboration, clear communication, and iterative feedback to ensure every project exceeds expectations. From startups to enterprises, I've built lasting partnerships by delivering high-quality, scalable results that stand out in competitive markets. I'm committed to staying ahead of trends in WebGL, WebXR, and immersive technologies to provide future-proof solutions

Frontend Engineer
Quadque Technologies Ltd.

December 2023 - July 2024

My role focused on system analysis, development, and optimization. Key contributions included:

- Researched, consulted, analyzed, and evaluated system and program needs to ensure alignment with business objectives.
- Identified technology limitations and deficiencies in existing systems, processes, procedures, and methods.

- Collaborated with users and stakeholders to gather, define, and formalize business requirements and specifications.
- Constructed workflow charts, diagrams, and technical specifications by studying system capabilities.
- Identified and assessed risks impacting system performance and security across the product lifecycle.
- Provided expert advice on software design proposals, including costing, financial evaluation, and upgrade recommendations.
- Designed and developed CI/CD strategies to enhance system design and software development workflows.
- Created, enhanced, and maintained tools for software development, management, automation, and security.
- Wrote, developed, and maintained program code in line with system requirements, technical specs, and quality standards.
- Implemented frontend and backend features, integrated third-party services, and ensured codebase scalability, maintainability, and type safety.
- Monitored project progress, tracked activities, resolved issues, prepared reports, and recommended corrective actions.
- Built and maintained strong relationships with partners and stakeholders for optimized systems integration.
- Advanced a CRM application using React.js and Redux by implementing Redis-based queue management, migrating UI to Tailwind CSS, converting codebase from JavaScript to TypeScript, and integrating Stripe payment gateway.
- Led full development of an Email Marketing platform with Next.js and Zustand, architecting frontend infrastructure, adding AI-powered content suggestions, integrating Stripe for billing, configuring a custom high-volume email server, and managing hosting/domain on DigitalOcean with Nginx.

Business Analyst

September 2021 - August 2024

VCube Soft and Tech

I collaborated with stakeholders to drive operational efficiency and software development initiatives. Key responsibilities included:

- Identified and communicated with users to formulate and produce detailed business requirements specifications.
- Determined operational objectives by studying business functions, gathering information, and evaluating output requirements and formats.
- Identified technology limitations and deficiencies in existing systems, processes, procedures, and methods.
- Recommended controls by pinpointing problems and authoring improved procedures.
- Wrote, updated, and maintained technical programs, end-user documentation, and operational procedures.
- Provided expert advice, guidance, and strategies for software design, including financial evaluations and costings for recommendations.
- Defined project requirements by outlining milestones, phases, and elements; formed and led project teams.
- Monitored project progress through activity tracking, problem resolution, progress reporting, and action recommendations.
- Conducted daily, weekly, and monthly reviews, analyzing processes with operational metrics and reports.
- Collected and analyzed operational metrics to inform decision-making.
- Led financial, product, market, operational, and related research to support strategic business planning across departments.
- Created and developed tools for software support, management, and security.
- Identified and mitigated risks impacting product performance and security throughout the lifecycle.
- Developed JavaScript and JSON scripts to optimize workflows, including Chrome extensions and custom spreadsheet functions.

RESEARCH & JOURNALS

Screening for common cancers using Ai

- Elsevier Book Chapter (**Published**)

Predicting suicide risks using Machine Learning among medical students in Bangladesh

- Masters Thesis & Journal (**Completed**)

Use of Artificial Intelligence in Sexual Reproductive Health & Rights

- Systematic Review (**In Peer Review**)

Use of Artificial Intelligence in Mental Health

- Systematic Review (**In Peer Review**)

EDUCATION & QUALIFICATION

M.Sc. in Computer Science | United International University 2024
Major: Software Engineering
CGPA: 3.50

B.Sc. in Computer Science | United International University 2020
Major: Computer Science, Minor: Big Data & High Performance Computing
CGPA: 3.01

TRAINING

NestJS Masterclass - NodeJS Framework Backend Development Udemy	2024 Online
ZTM: Complete React Developer in 2023 Udemy	2023 Online
User Stories in Agile Projects Udemy	2023 Online
Learn A-Frame and get ready for WebVR Udemy	2022 Online
Threejs Journey Threejs Official Website	2020 Online
React Typescript Udemy	2020 Online
Ui/Ux Designing Certification CodersTrust	2017 Dhaka, BD
Living on Codes: Learn Laravel Vantage Labs	2014 Dhaka, BD

CORE SKILLS

Coding Language: JavaScript | Typescript

Libraries: React.js | Three.js | Cannon.js

Frameworks: Nextjs | Nestjs

ORM: Prisma | TypeORM | MikroORM

Databases: PostgreSQL | MySQL

Tools: Git | Docker | ViTest | Jest | GraphQL

SOFT SKILLS

Client Communication | Project-Based Learning | Process Flow Management | Team Management | Product Management | System Analysis | UI/UX Designing | Data Analysis | Requirements Engineering | Market Research | Software Product Design | Feasibility Check

LANGUAGES

Bengali (Native) | English (Fluent) | Hindi (Conversational)
