TO WHOM IT MAY CONCERN

This is to certify that Mr. Zulker Nien worked for Quadque Ltd. from 3rd December 2023 to 11th July 2024. He worked as a Frontend Engineer in the Tech department. He was a full-time employee entitled to work at least 40 hours/week, and his last monthly salary was BDT 40,000. During this period, his services were found to be satisfactory in carrying out the job duties. His responsibilities were to:

- Researching, consulting, analyzing, and evaluating system and program needs.
- Identifying technology limitations and deficiencies in existing systems, processes, procedures, and methods.
- Communicating with users and stakeholders to gather, define, and formalize business requirements and specifications.
- Constructing workflow charts, diagrams, and technical specifications by studying system capabilities.
- Identifying and assessing risks affecting system performance and security throughout the product lifecycle.
- Providing advice, guidance, and expertise on software design proposals, including costing, financial evaluation, and upgrade recommendations.
- Designing and developing continuous improvement and continuous delivery (CI/CD) strategies across system design and software development workflows.
- Creating, enhancing, and maintaining tools required to support software development, management, automation, and security.
- Writing, developing, and maintaining program code according to system requirements, technical specifications, and accredited quality standards.
- Implementing frontend and backend features, integrating third-party services, and ensuring codebase scalability, maintainability, and type safety.
- Monitoring project progress, tracking activities, resolving issues, preparing progress reports, and recommending corrective actions.
- Building and maintaining strong relationships with partners and stakeholders to support optimized systems integration.
- Contributing to the ongoing development of a CRM application built with React.js and Redux by implementing Redis-based queue management, migrating the UI to Tailwind CSS, converting the entire codebase from JavaScript to TypeScript, and integrating the Stripe payment gateway.
- Leading the full development of an Email Marketing platform using Next.js and Zustand by architecting the frontend infrastructure, implementing AI-powered content suggestions, integrating Stripe for subscription billing, configuring a custom high-volume email server, and managing hosting and domain configuration on DigitalOcean with Nginx.

I wish him every success in his future endeavors.
